Terminal Block with Wire Wrap Termination

CPE/Premise Wiring

Headend/CO

Utility/Municipality

88-128

88 Equipment Terminal Blocks are used to terminate exchange equipment pairs on the horizontal side of a conventional main distribution frame (MDF) and provide a cross-connect field for jumpering to the Outside Plant (OSP) vertical side of the frame.

KEY PRODUCT BENEFITS

- ▶ Eight-inch block accommodates most conventional horizontal frame mounting configurations
- ▶ Mounting bracket included for easy installation
- ▶ Up to 256 pair wire-wrap output termination provides maximum density
- ▶ Bifurcated wire wrap pins for the cross-connect field are available
- ▶ Hinged connection field facilitates easy termination of equipment pairs
- ▶ Special housing allows neat and organized administration of incoming cross-connect pairs
- ▶ Flat face allows use in tight quarters such as cabinets and vaults
- ▶ Ample designation areas on both front and back of the cover
- ▶ Designation label included

INDUSTRY STANDARDS

- ▶ Complies with Telcordia specifications
