Utility/Municipality

88-200C5M

88-(XXX)C Equipment Terminal Blocks are used to terminate the exchange equipment pairs on the horizontal side of a conventional main distribution frame (MDF), and provide the cross-connect field for jumpering to the Outside Plant (OSP) vertical side of the frame. They also feature CAT5 compliance for superior transmission of DSL signals and other high frequency circuits.

KEY PRODUCT BENEFITS

▶ Eight-inch block accommodates most conventional horizontal frame mounting configurations

▶ Mounting bracket included for easy installation

▶ RJ21 connectorized input field to allow easy connection of equipment

▶ Up to 256-pair wire-wrap output termination provides maximum density

▶ Complies with Telcordia specifications

▶ Special housing allows neat and organized administration of the incoming cross-connect pairs

▶ Flat face allows use in tight quarters such as cabinets and vaults

▶ Internal twisted pair wiring provides CAT5 rated performance for superior transmission of DSL and other high frequency applications

▶ Ample designation areas on both front and back of the cover

▶ Designation label included

INDUSTRY STANDARDS

▶ Complies with Telcordia specifications
